Internet Services

Mapped Drive Setup

Step 1: Connect to the VPN Connection setup for hosting.aggienetwork.com. If this is not setup, please refer to the Virtual Private Network (VPN) Connection Instructions.

Step 2: On your Windows Desktop, right-click My Computer and select Map Network Drive
Step 3: Select a Drive that you would like to use (i.e. W: for Web). In the Folder box, type in the following information:
\10.10.10.1\[username]$ 

So, for an account with the username of classof2020, the text would read:
\10.10.10.1\classof2020$

For an account with the username of brazosamc the text would read:
\10.10.10.1\brazosamc$

Do NOT forget the $ at the end of the username. The drive will not work without that.

Click Finish

Step 4: Enter in your username and password in the appropriate fields and check Remember my password. Click OK
**Step 5:** Once the connection is made, a window will popup similar to below with the account information. **Place all of your documents in this directory.** You are done.
